INTRODUCTION

Teacher's Guide Module for Mathematics is aimed at developing knowledge and awareness of Renewable Energy (RE) and Energy Efficiency (EE) for Primary School students. The Mathematics activities in this module are designed for Year One to Year Six pupils. The activities focus on Mathematics concepts as well as creating awareness of Renewable Energy and Energy Efficiency. The Mathematics activities are identified from the associated learning areas of the curriculum for primary schools published by The Curriculum Development Centre, Ministry of Education Malaysia. The Teacher's Guide Module has to be used together with the Student's Activity Module For Primary School English.

CONTENTS

YEAR 1

I Can Say A Numbers	3
I Can Count Numbers 1 To 9	8
I Can Write 0 To 10	13
I Can Count Numbers 11 To 20	16

YEAR 2

Using Addition In Everyday	21
Using Substraction In Everyday Life	25
Using Multiplication In Everyday Life	28

YEAR 3

Use Addition In Real Life Situations	32
Recognise Substraction As The Inverse Of Addition	38
Use Substraction In Real Life Situations	43
Use Multiplication In Real Life Situations	49
Use The Operation Of Division	52

YEAR 4

Solve Substraction Problems	59
Value Of Money	62

YEAR 5

Measuring Length	67
Relationship Between Units Of Mass	70

YEAR 6

Average	74
Multiply By Two Digits Numbers	78
Computation Of Volume Of Liquid	81
